EDUGENIE: GOOGLE GEMINI POWERED LEARNING ASSISTANT

Phase 1: Brainstorming & Ideation Phase

The Brainstorming and Ideation Phase focused on identifying the need for an intelligent educational assistant that could help students understand and learn educational content more effectively.

The idea of **EduGenie** was developed as an AI-powered learning assistant that combines several educational features in a single platform. The proposed system enables users to ask questions, obtain simplified explanations, summarize lengthy content, generate quizzes, and receive personalized learning recommendations.

The main ideas identified during brainstorming were:

- AI-based question answering
- Simplified explanation of complex concepts
- Automatic quiz generation
- Summarization of lengthy study material
- Personalized learning recommendations
- Beginner-to-advanced learning guidance
- Simple and responsive web interface
- Accessible learning support for students and self-learners

The overall vision was to create a lightweight and user-friendly educational assistant that makes learning more interactive and personalized.
