# EDUGENIE: GOOGLE GEMINI POWERED LEARNING ASSISTANT

## Phase 6: Project Testing Phase

The Project Testing Phase focused on checking whether all functionalities worked correctly.

### Local Deployment Testing

The application was run using:

```
uvicorn main:app --reload
```

The application can be accessed at:

```
http://127.0.0.1:8000
```

**Fig: Application Access**

### Functional Testing

The following functions were tested:

- Asking questions
- Getting explanations
- Generating quizzes
- Summarizing paragraphs
- Generating learning plans

### Quiz Testing

The quiz functionality was tested to verify that:

- Three questions are generated.
- Each question contains four options.
- Correct answers are identified.
- Questions are related to the given passage.
- Incorrect answers can be handled appropriately.

## Integration Testing

Frontend and backend communication was tested to ensure that user requests were successfully sent to the appropriate API endpoint and that results were correctly displayed.
