EDUGENIE: GOOGLE GEMINI POWERED LEARNING ASSISTANT

Phase7: Project Documentation Phase

The Project Documentation Phase involved recording the complete development process and preparing the final project report.

The documentation contains:

- Project introduction
- Project objectives
- Requirements
- Technologies used
- AI model selection
- System architecture
- Folder structure
- Module implementation
- API endpoints
- Frontend development
- Integration process
- Testing
- Deployment
- Application screenshots
- Results
- Challenges
- Future enhancements
- Conclusion

Application Screenshots

The project documentation includes figures showing:

- EduGenie home page
- Asking questions
- Explanation of topics
- Summarizing long paragraphs
- Generating quizzes
- Learning recommendations
- API endpoints
- Frontend integration

These screenshots demonstrate the working of the developed application.
